Education

Comsats University

Feb. 2021 – Feb 2025

Bachelor of Science in Computer Science

Attock, Punjab

Relevant Coursework

- Data Structures
- OOP
- PF
- Database Management
- Artificial Intelligence
- Internet Technology
- Mobile App Development
- Computer Architecture

Experience

Ezitech

June 2024 – August 2024

Flutter Developer Intern

Rawalpindi, Punjab

- Developed a News app using API integration, the app would automatically fetch fresh news from the API. A categories option was also available in that app to filter your interest in news headlines.
- Developed a Room finder app that would help users or tourists find the perfect room for their desired purposes, The room finder app would show them different types of rooms with different prices, with the facility of on-time booking through the app.
- Developed a Chatbot that would take input as text and image and would return output in text or image. The Gemini API was used for this purpose.
- Developed a full stack app for the Ezitech institute it self, App would allow new interns to signup and review their progress record during the internship

Projects

Eye doctor pro | Python, Flutter, Firebase

April 2024 – Jan 2025

- Developed an App for users suffering from a specific eye disease
- Implemented a chatbot to assist users with their queries further.
- Created a database using Firebase so users can easily keep their data safe,
- A Deep learning model was used that would take an image from the user and tell the user whether he/she would have a disease or not.

Room Finder App | Flutter, Android Studio, FireBase

July 2024

- Created an Android application using Flutter and Android Studio to help users find a room.
- Google auth and Facebook auth along with the phone number (OTP) auth was used so users can have a secured environment.
- Users have the facility to book the room for themselves using the app.

Gaming App | Flutter, APIs

Feb 2024

- Designed an interactive gaming app for pokemon game lovers with a variety of Pokemon and their information.
- All the information about the characters was fetched from an API.
